No. 366

monthly review of business statistics

MAY 1968

Prepared under instructions from the Right Honourable the Treasurer

by K. M. ARCHER, Commonwealth Statistician

Commonwealth Bureau of Census and Statistics, Canberra, Australia

The following symbols, where shown in columns of figures, mean—

- n.a. Not available.
- .. Nil or less than half the final digit shown, or not applicable.
- p Preliminary—figure or series subject to revision.
- r Figure or series revised since previous issue.
- Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g., 1966, refer to the year ended 31 December 1966; those shown as, e.g., 1965-66, refer to the year ended 30 June 1966. Any discrepancies between totals and sums of components in tables are due to rounding.

Values are shown in dollars (\$) or cents (c) Australian with or without the letter A.

SEASONALLY ADJUSTED INDICATORS

In the Contents, page one, page numbers of series containing seasonally adjusted indicators are marked with asterisks.

Details of the methods used in seasonally adjusting these and other series are given in *Seasonally Adjusted Indicators 1968*, issued by this Bureau in May 1968, which contains original and seasonally adjusted data in tabular and graphical form for sixty-six selected series. The seasonally adjusted indicators included therein are up-dated in relevant monthly and quarterly publications of this Bureau.

As well as being adjusted for normal seasonal factors, some of the statistical series included in the Review have been adjusted for the effects of some calendar irregularities, namely: 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the influence of moveable holidays, i.e. Easter. The adjustments made to each series are indicated in Appendix B of *Seasonally Adjusted Indicators 1968*.

For explanatory matter on seasonal adjustment of National Accounts see *Quarterly Estimates of National Income and Expenditure No. 29, September Quarter 1967*.

CONTENTS

	Page
POPULATION AND VITAL	
Marriages, births, deaths, net overseas migration and population	3
Overseas arrivals and departures	4
EMPLOYMENT AND UNEMPLOYMENT	
Wage and salary earners in civilian employment: Australia	5-7 *
Wage and salary earners in civilian employment: States	8, 9
Persons registered for employment; job vacancies	10, 11 *

(a) Includes particulars of Aborigines from 1 January 1967. (b) Excess of births registered over deaths registered. (c) Excess of recorded overseas arrivals over recorded overseas departures. (d) Includes Aborigines from 30 June 1961. (e) Increase consists of natural increase, net overseas migration gain and adjustments for differences between the population estimated and recorded at census dates (up to 1966 Census). (f) Population at Census date. (g) Includes an estimate for Aborigines out of contact at the Census.

POPULATION: STATES

A new series of State population estimates has been introduced from 30 September 1961 (see Australian Demographic Review No. 236 for explanation of method used). In addition, for dates commencing 30 June 1961, all population figures include Aborigines. The results of the 1966 Census have been taken into account in the preparation of these estimates.

Date	New South Wales	Victoria	Queens- land	South Australia	Western Australia	Tasmania	Northern Territory	Australian Capital Territory	Australia
30 June—									
1956	3,554,257	2,593,468	1,381,591	848,557	674,529	318,470	19,556	35,135	9,425,563

(a) Based on Population Count of Canberra. (b) Census. (c) See note above. (d) Includes an estimate for Aborigines out of contact at the Census.

OVERSEAS ARRIVALS AND DEPARTURES

Permanent movement—persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad.

Long-term movement—arrival of visitors and temporary departure of residents with the stated intention of staying (in Australia or in a country abroad respectively) for twelve months or more, and the departure of visitors and return of Australian residents who have stayed (in Australia or in a country abroad respectively) for twelve months or more.

Short-term movement—all other overseas arrivals and departures, including those of Australian troops irrespective of period of stay, and U.S. troops visiting Australia on rest and recreation leave. The latter are classified for statistical purposes as short-term visitors.

Crew members, persons passing through Australia on board the same ship or on the same flight (variously called direct transit passengers or 'through' passengers) and passengers on short pleasure cruises commencing and finishing in Australia on ships not then engaged in regular voyages, are excluded from these statistics.

Arrivals

Period	Permanent movement	Long-term movement		Short-term movement		Total arrivals	Excess of total arrivals over total departures
	Settlers arriving	Residents returning	Visitors arriving	Residents returning	Visitors arriving

(a) The figures in this table, except those relating to government employees, are based on comprehensive data from the Population Censuses of June 1954 and June 1961. Estimates for months subsequent to June 1961 are derived from current pay-roll tax returns, returns of government employment, other direct records of employment, and estimates of the number of employees not covered by these collections. The figures are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. Estimates for June 1966 and subsequent months will be revised as soon as possible. The new series, which will be at a higher level than the present series, will be based on 1966 Census benchmarks. In due course estimates for periods prior to the census of June 1966 will also be revised, but on a basis comparable with that of the 1961 census benchmarks. (b) Includes employees engaged in selling and distribution, etc., as well as those occupied directly in manufacturing activity. (c) Includes law and order; religion and social welfare; health services; education; and other community and business services. (d) Includes forestry, fishing and trapping; mining and quarrying; electricity, gas, water and sanitary services; and communication. (e) Affected by industrial disputes.

(b) In reception and training centres

VALUE OF RETAIL SALES (a): COMMODITY GROUPS*

Figures are on a basis comparable with the 1961-62 Retail Census. The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961-62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

(\$ million)

Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the year 1961-62 are derived from a census taken in respect of that year, whereas other figures are estimates made by means of sample surveys.

(a) Excludes Northern Territory and Australian Capital Territory.

Note. Figures from June quarter, 1967 are subject to revision when more precise information is available relating to trading by new businesses. Series has been revised from July 1962.

INSTALMENT CREDIT FOR RETAIL SALES

The following statistics cover all types of schemes which relate primarily to the financing of retail sales of goods and in which repayment is made by regular predetermined instalments. Types of schemes covered include hire purchase, time payment, budget account, and personal loans relating primarily to financing of retail sales of goods.

WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports are taxable. The returns do not relate to all wholesale trades as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

(a) Owing to insufficient information it is not possible to treat unassembled tractors and other machinery in a similar manner to motor vehicles and all such machinery is treated as capital equipment whether imported in an assembled or unassembled condition. (b) Includes replacement parts, completely knocked-down vehicles and components for the assembly of motor vehicles. (c) Excludes a percentage for piece-goods to be sold by retail and paper to be used solely for wrapping which are recorded in classes VI. E-J and III. respectively. (d) Excludes crude petroleum which is included in class I. C. (1-4). (e) Includes a percentage for paper used solely for wrapping, see note (c). (f) Includes H.M.A.S. 'Perth'. (g) Includes H.M.A.S. 'Hobart'.

EXPORT PRICE INDEX

The table below sets out Export Price Index numbers on the reference base: Year 1959-60=100. A full description of the index and its relationship with the previous index is given in Commonwealth Year Book No. 53, 1967. Index numbers of the previous Export Price Index, converted to the base: Year 1959-60=100 are set out on page 24.

(Base of each index: Year 1959-60=100)

(a) These indexes are calculated largely by a direct revaluation at base year prices of quantities of goods exported and imported, or where this is impracticable, by dividing values by appropriate price indexes. (b) Excludes gold. (c) Excludes machinery. (d) New series of index numbers on the base year, 1966-67=100, are currently under preparation.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive. Work is proceeding on the preparation of new series of wholesale price index numbers. Meanwhile, the present series continue to be compiled on their existing basis, which has become increasingly affected by changes in usage, changes of category as between 'imported' and 'home-produced' for some commodities, and changes in industrial structure.

(Base of each index: Average of three years ended June 1939 = 100)

Period	Basic materials							Food-stuffs and tobacco	Basic materials and foodstuffs		
	Metals and coal (a)	Oils, fats and waxes	Textiles	Chemicals	Rubber and hides	Building materials	Total		Goods principally imported (b)	Goods principally home produced	Total all groups

March											

(a) Special purpose index for the 'Metals and Coal' group excluding Coal and Briquettes for March 1968 is (b) Represents only such imported commodities as are included in the Wholesale Price Index and does not measure changes in prices of all imports.

PRICE INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations.)

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

WHOLESALE PRICE INDEXES

The items priced and the levels at which they are priced in these indexes vary widely according to the intended purposes of the indexes of the various countries.

(Base of each index : Year 1963 = 100)

(a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid distortions that would occur in rounding off the figures to the nearest whole number.

SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, and whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per \$2 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

INDEX OF PRICES OF SHARES ON SYDNEY STOCK EXCHANGE

(Base of each index: Average of 3 years ended June 1939 = 1,000) (a)

Period	Twenty-three manufac- turing and distributing companies	Ten retail companies	Four pastoral and finance companies	Four insurance companies	Total seventy-five companies	Thirty-four active shares included in foregoing

January 1968	39.95	39.97	39.98	39.96	39.89	39.97	39.96	100.0
------------------------	-------	-------	-------	-------	-------	-------	-------	-------

(a) For a full week's work (excluding overtime), as prescribed in awards, determinations and agreements. Excludes rural. Rates shown should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends. They do not measure the relative level of minimum wages as between States. Figures for July 1966 and subsequent months are subject to revision. (b) Excluding rural, and shipping and stevedoring.

(a) Rates are operative from the beginning of the first pay-period commencing in the month shown or commencing on or after the date shown. (b) Basic wage for adult females 75 per cent of adult male rate. (c) Automatic quarterly adjustments in accordance with variations in retail price index numbers discontinued. (d) Rates declared subsequent to an inquiry. (e) Automatic quarterly adjustments in accordance with variations in retail price index numbers, operated until May 1964. (f) Rates same as for Commonwealth basic wage rates. (g) See Special note below.

Special note. The latest **Commonwealth** rates shown in the above table applied before the decision of the Commonwealth Conciliation and Arbitration Commission in June 1967 to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967. Total wages for adult males and adult females were to be increased by \$1 a week from the same date.

Subsequent to the above increases in Commonwealth awards, **State** award wages were also increased as follows. In **New South Wales** award rates of wages and salaries for adult males and adult females were increased by the addition of a fixed loading of \$1 per week described as 'July 1967 economic loading' to take effect from the beginning of the first pay-period to commence on or after 1 July 1967. Subsequently legislation fixed the basic wage for adult males at \$34.50 per week and for adult females at \$26.10 per week to operate from 1 January 1968. The increase of \$1 in each basic wage absorbed the July 1967 economic loading which was then omitted from awards and agreements. In **Victoria** wage rates for adult males and females in most Wages Board determinations were increased by \$1 a week from 1 July 1967. Basic wages and margins were deleted from determinations and wage rates expressed as total wages. In **Queensland** award rates of pay for both adult males and adult females were increased by \$1 a week to operate from 3 July 1967. In **South Australia** the living (basic) wages for both adult males and adult females were increased by \$1 per week to operate from 3 July 1967. In **Western Australia** the Industrial Commission decided that the minimum weekly wage payable to adult male workers under certain awards would be increased from \$36.55 to \$37.55; that wage rates for adult workers not in receipt of the minimum wage would be increased by 60 cents per week; and that these increases operate from the beginning of the first pay-period commencing on or after 1 July 1967. In **Tasmania** the chairman of the Wages Boards announced on 4 July that a \$1 per week increase in basic wage rates for adult males and adult females would be incorporated in Wages Boards determinations beginning in July 1967.

AVERAGE WEEKLY EARNINGS^(a) PER EMPLOYED MALE UNIT^(b)

The following figures are derived from employment and wages and salaries recorded on pay-roll tax returns, from other direct collections and from estimates of the unrecorded balance. The figures relate to civilians only. Figures for periods subsequent to June, 1961 will be revised when new employment benchmarks from the 1966 Census become available.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by the total number of civilian employees expressed in male units, i.e., total male employees plus 55 per cent of female employees. This proportion is derived from the estimated ratio of female to male earnings in Australia. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. (c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) All industries—Australia, base 1953-54 = 100. There has been no change in the basis of seasonal adjustment of this series. It has not yet been adjusted by the programs used for other Bureau series.

Note. Quarterly figures are affected by seasonal influences. Comparisons as to trend are generally best made by relating complete years or corresponding periods of incomplete years. However, from December quarter 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

(a) Individual living units. Only new flats are included, i.e., the conversions of old buildings into flats are omitted. Figures for flats include 'home units'.

CAPITAL EXPENDITURE BY PRIVATE BUSINESSES

These statistics are designed primarily to measure trends in expenditure by private businesses on fixed tangible assets. The statistics are based on returns obtained from private businesses subject to pay-roll tax (other than businesses in rural, professional, gas and electricity industries), from government banks and airlines, and from other businesses not subject to pay-roll tax which undertake projects of more than \$500,000 in any half year. For statistics of capital expenditure by all private businesses, see the series 'Gross Fixed Capital Expenditure' on page 54 of this publication.

(\$ million)

(a) Engineering, metalworking, electrical equipment. (b) Vehicles, aircraft and ships, parts and accessories. Includes assembly and repairs. (c) Chemicals, fertilisers, paints, explosives, cosmetics and oil refining. (d) Sawmilling, furniture, plastics, leather, rubber, etc. (e) Road, rail and air transport (including government airlines), shipping and stevedoring. (f) Building, construction, banking (including government banks), insurance, other finance and property, amusement, hotels, cafes, personal services, etc. (g) Includes assets such as buildings, wharves, railway and harbour construction, roads and also lifts, heating and ventilation equipment and the like forming an integral part of the structure. (h) Includes all machinery and equipment including vehicles, aircraft and ships, and such items as new motors, lathes, office equipment and fixtures

* Also seasonally adjusted—see below.

INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

(Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations)

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -119-) indicates that two series have been linked at that period.

(Base of each index: Year 1963 = 100)

RAILWAYS AND SHIPPING

Part of the shipping cargo is recorded in tons weight and part in tons measurement. As the total cannot be stated accurately as either tons weight or tons measurement, each is recorded and published separately; 1 'ton measurement' equals 40 cubic feet.

Period	Government railways				Overseas cargo				Interstate cargo shipped	
	Goods and livestock		Pas- senger- journeys	Gross earnings	Shipped from Australian ports		Discharged at Australian ports

(a) Actual collections. (b) Combined broadcast listeners' and television viewers' licences commenced 1 April 1965 and are issued to persons owning both television and broadcast receivers at the same address. New issues of combined licences may include renewal licences of either type. (c) Demand for telephone services, allowing for applications withdrawn during period. (d) Monthly average. (e) Exchange lines only. (f) From March 1962, excludes short-term hirers' licences which were previously included. (g) Monthly total.

(a) For current account balances, minus sign (—) denotes deficit; for capital items other than monetary movements, minus sign (—) denotes outflow; for monetary movements, minus sign (—) denotes decrease in international reserves or net I.M.F. position or an increase in net liabilities of the Reserve Bank to foreign central banks. (b) The amounts shown represent the recorded trade figures adjusted for balance of payments purposes. Adjustments affect both coverage and valuation. (c) Details of some components of other private capital movements are not available by quarters. Other private capital movements for these periods are therefore combined with the balancing item. (d) Includes items marked (*) for which quarterly details are not available. (e) Excludes reduction of \$113 million in the Australian dollar equivalent during November due to the devaluation of the pound sterling and a number of other currencies held as part of Australia's international reserves.

Note. For more detailed information see the half-yearly mimeographed bulletin *Balance of Payments*. Series revised from September quarter 1966.

(a) For reference to concepts see *Australian National Accounts, National Income and Expenditure 1953-54 to 1966-67*, issued May 1968, For explanatory matter on seasonally adjusted series see *Quarterly Estimates of National Income and Expenditure* No. 29, September Quarter 1967.

Series revised

NEW CAPITAL RAISINGS BY COMPANIES IN AUSTRALIA

The following statistics show the net amount of cash transferred from the investing public to companies in Australia through the types of capital specified. For this purpose the 'investing public' includes banks and life insurance companies (except when subscribing to issues by associated companies) and superannuation funds. The statistics do not include changes in bank overdraft, loans to authorised dealers in the short-term money market, or deposits accepted by banks, insurance companies, pastoral companies or building societies.

(a) See footnote (a) page 58. (b) This series has been compiled from information supplied by the major trading banks as at second Wednesday of each month. Prior to July 1962, the series covered all new and increased lending commitments entered into by banks which require the approval of a formal limit on a customer's overdraft account. Commitments in respect of temporary advances to woolbuyers and in respect of term loans were excluded. As from July 1962, the series has been extended to include new commitments in respect of the term lending arrangements established in mid-April 1962. The figures represent gross new lending commitments of banks and do not take account of cancellations and reductions of existing limits. Figures for cancellations and reductions of existing limits can be estimated from this series (after deducting term loan and farm development loan components and adjusting the weekly average to a monthly basis) in conjunction with that of overdraft limits. However, such estimates should be regarded as an approximation only, since there are unavoidable differences in the basis of compilation of the two series. (c) Excludes limits in respect of temporary advances to woolbuyers and term loans. (d) Year ended second Wednesday of July.

(a) Includes assets in Papua, New Guinea and Norfolk Island. (b) Includes treasury bills and treasury notes. (c) Not available. Short-term money market established in February 1959. (d) Includes abnormal stocks of currency held by banks during the changeover to decimal currency.

FINANCE COMPANIES

The following series of statistics cover the main types of lending by finance companies in Australia, including instalment credit for retail sales, wholesale hire purchase, other consumer and commercial loans (comprising personal loans, mortgage loans and advances), factoring and leasing. Information on the scope of these statistics and the definition of items are included in the bulletin *Finance Companies, July 1964 to September 1967*, which in addition contains more detailed statistics. Supplementary classifications are also provided for the instalment credit for retail sales transactions of finance companies. Amount financed is classified by type of commodity and collections and other liquidations is divided between cash collections and other liquidations.

(a) Excludes business of the Government insurance office of New South Wales and the Queensland State Government Insurance office, which operate only in New South Wales and Queensland respectively. Figures compiled from monthly returns. (b) Relates to periods during which policies were recorded in company registers, which may be subsequent to periods in which written. Recordings tend to concentrate more in the last month of a company's year; months mainly affected are September and December. (c) Includes consideration for annuities. (d) Includes claims paid on death or maturity, payments made on surrender of policies, annuities and bonuses paid in cash. (e) Excludes 'advances of premiums'. (f) Figures for earlier periods not available separately; included with ordinary business. (g) Includes superannuation business. Separate details of superannuation business were available from the last six months of 1961-62.

(a) Source: Reserve bank. Net gold and foreign exchange holdings (official and banking institutions). See page 39, Reserve bank of Australia statistical bulletin, financial supplement, September 1963, for a description of this series. Annual and December figures as at end of period, other figures last Wednesday of month. (b) Average of daily quotations based on daily returns from Reuters Economic Services. (c) Source: Reserve Bank. Yields are to last date of redemption. Income tax rebate of 10c in the dollar has not been taken into account. Excludes the effect of brokerage. Figures relate to last Wednesday in month. (d) Average of buying and selling rates for telegraphic transfers. (e) Selling rate. Direct quotation. (f) Includes all mortgages for corporations (other than banks and building societies) and individuals except abnormal amounts of \$2m or more in months in which large mortgages are few in number. (g) Weighted average twelve months. (h) Three monthly moving average ended month shown. (i) Reserves fell by \$24.8 million between the last Wednesdays in October and November. This fall includes a loss of approximately \$113 million resulting from the devaluation of United Kingdom and New Zealand currencies. (j) From 1 April 1968 quoted in \$U.S.

(a) Prior to 8 April 1964, banks were not permitted to accept fixed deposits for periods less than 3 months. From 8 April 1964, banks were permitted to accept fixed deposits in excess of \$100,000, for periods of 30 days but less than 3 months at rates not exceeding the maximum rates shown.

(b) From 17 November 1960, to 9 September 1962, banks did not accept fixed deposits for periods longer than 12 months. From 10 September 1962, to 28 September 1964, banks were permitted to accept fixed deposits for periods up to 15 months. From 29 September 1964, banks were permitted to accept fixed deposits for periods from 12 to 18 months.

(c) From 29 September 1964, banks were permitted to accept fixed deposits for periods over 18 months to 24 months.

(d) The trustee savings banks and two State savings banks offer slightly higher rates.

(e) Average rate on all advances not to exceed 6 per cent.

(a) Figures for N.S.W. represent combined transactions of consolidated revenue fund and business undertakings—railways, tramways, omnibuses and Sydney Harbour Trust section of Maritime Services Board—included in annual Budget Papers. Adjustments have been made to exclude duplications.

(b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State consolidated revenue funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and national welfare fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
